Java Developer

Experienced business executive with Scrum Team experience looking for an entry-level Java developer position in an environment where I can use my enterprise-level Agile Development skills combined with my recent developer education to help solve complex business problems.

Skills and Abilities

Software: Java, C#, SQL, CSS, HTML & Adobe Creative (Photoshop, InDesign and Illustrator)

Operating Systems: iOS and Windows

Education

The Iron Yard, Minneapolis, MN

Backend Development (anticipated graduation: February 2017)

North Hennepin Community College, Brooklyn Park, MN

Associate in Science: Computer Science (in progress)

John Brown University, Siloam Springs, AR

Bachelor of Arts: Education

Experience

Target Corporation, Minneapolis, MN

Operations Manager | 2014-2015

- Identified Agile solutions with Information Technology Scrum teams to bridge the gap between a customer's experience in a physical location versus their virtual location, increasing customer satisfaction year over year.
- Developed training and change management tools for leaders and teams using the new technology.
- Documented best practices and reporting processes to support end users.

Human Resources Senior Consultant | 2013-2014

- Delivered innovative solutions for Information Technology and Process teams for business problems that impacted store employees.

Corporate Security Manager | 2011-2013

- Designed, implemented and supported world-class security system installations across 2000 locations worldwide.
- Led annual project workload that exceeded \$40 million capital dollars.

Store Team and Operations Manager | 2008-2011

- Led total team and store operations (\$40+ million/year).
- Managed 8 Assistant Managers, 16 Area Managers and approximately 200 team members.
- Coached and promoted multiple Assistant Managers, Area Managers and Team Members.
